DIGITAL GOVERNANCE ARCHITECT | PRIVACY ENGINEERING & VENDOR RISK

Innovative digital architect and cross-functional integrator operating at the intersection of web technology, data analytics, regulatory privacy, and vendor governance. Grounded in a strong fusion of technical systems engineering and business strategy, with a proven track record of aligning Legal, Privacy, Engineering, and Marketing stakeholders. Expert in architecting privacy engineering frameworks (Transcend CMP / CPRA), automated vendor governance (ObservePoint), AI-driven third-party risk analysis, and real-time executive analytics (Adobe Analytics / ThoughtSpot).

CORE COMPETENCIES

Privacy & Governance: Privacy Engineering (CPRA / CMP), Third-Party Website Vendor Risk Management, Due Diligence Questionnaires (DDQ), Web Security Remediation, Data Anonymization. | Analytics & Performance: Real-Time Incident Response, Executive Dashboarding, Sales Funnel Optimization, Network Latency Reduction.

Technical Skills

Transcend CMP, ObservePoint, Adobe Analytics, Google Analytics, ThoughtSpot, Ghostery, Sitespeed.io, Voice of the Customer (VoC: Foresee, OpinionLab, Medallia).

PROFESSIONAL EXPERIENCE

VERIZON, Alpharetta, GA

Senior Manager - Experience Management, July 2020 - August 2026

Digital Operations & Privacy Architect

- Enterprise Privacy Architecture (CMP): Directed a comprehensive compliance audit across an enterprise portfolio of 200+ domains (>1.2 million pages); conducted deep-dive technical remediation on 14,000+ pages.
- Transcend Implementation: Customized and deployed the Transcend CMP platform enterprise-wide, developed business-unit-specific implementation code, mitigated malware and derelict site risks, and trained technical teams, leading to a successful handoff to a dedicated four-person management team.
- AI-Driven Vendor Governance: Governed a complex MarTech ecosystem of ~150 active vendor products; utilized ObservePoint and custom AI models to continuously monitor behavioral changes, financial stability, corporate acquisitions, and emerging compliance threats.
- Strategic Vendor Co-Development: Engaged with vendors to identify implementation gaps and edge-cases in emerging data capture technologies, contributing strategic technical feedback that influenced their commercial product roadmap. Changes improved security, and resolved event capture issues and CSP errors.
- Agentic AI Strategy: Authored foundational Agentic AI strategy for 1 to 1 customer personalization-leveraging vendor/customer interactions to drive unique next-best actions which ultimately informed corporate AI direction.

Distinguished Member Of The Technical Staff, December 2011 - July 2020

- Real-Time Peak Event Operations: Built live operational dashboards using ThoughtSpot, Adobe Analytics, and Google Analytics for high-stakes retail periods experiencing >10x baseline traffic (e.g., Black Friday, major product launches), enabling rapid anomaly detection and safeguarding digital sales funnels.
- Web Performance & Tag Optimization: Optimized enterprise web performance by restructuring page load sequences, optimizing image sizes and formats, and strategically deferring third-party vendor scripts to eliminate render-blocking and ensure a seamless user experience.

- VoC Enhancements: Integrated and customized enterprise Voice of the Customer (VoC) platforms (Foresee, OpinionLab, Medallia), enriching feedback mechanisms with behavioral user data to map specific customer journeys.
- Performance Auditing: Leveraged technical auditing tools (ObservePoint, SiteImprove, Tag Inspector, Sitespeed.io, Ghostery, Chrome DevTools) to proactively identify and remediate performance bottlenecks, ensuring high-speed delivery of critical assets.
- Executive Intelligence: Automated daily and weekly sales performance suites, transforming complex web metrics into actionable strategic storytelling to guide multichannel marketing and business intelligence decisions.

Additional Relevant Experience

ALLTEL TELECOM (ACQUIRED BY VERIZON), Alpharetta, GA

Developer & Consultant

- Core Systems Architecture: Engineered and built core components of an enterprise cellular billing platform, including automated collections workflows, an asynchronous switch interface, mobile activity management modules, distributed database schema management, and synthetic test database generation.
- M&A Data Extraction & Segmentation: Engineered the critical data extraction of 13 million active customer records from a legacy Unix-based Oracle database during the Alltel-to-Verizon corporate acquisition.
- Regulatory Data Compliance: Managed complex data segmentation to satisfy antitrust regulatory approvals, successfully identifying and carving out divested customer records from the primary migration.
- Technical SME & Data Mapping: Served as a legacy-data Subject Matter Expert (SME) for acquiring engineering teams, providing comprehensive data dictionary mapping and resolving complex data architecture inquiries.

EDUCATION

Master of Business Administration (MBA)

Digital Marketing and Business Analysis

Gies College of Business, University of Illinois, Urbana/Champaign, IL

Bachelor of Science, Computer Information Systems

Bachelor of Science, Management

Ferris State University, Big Rapids, MI
